

## ENVIRONMENTAL POLICY

Dongara Marine believe that we have a responsibility to care for and protect the environment in which we operate. We are fully committed to improving environmental performance, and will encourage our business partners, customers and members of the wider community to join us in this effort. Environmental impacts are significant consideration in all vessels we design and build.

We will strive to:

- Adopt the highest environmental standards in all areas of operation, meeting and exceeding all relevant legislative requirements;
- Assess our organisational activities and identify areas where we can minimise impacts;
- Minimise waste through careful and efficient use of all materials and energy;
- Purchase sustainable products wherever feasible [e.g. recycled, or low environmental impact products and energy from renewable sources];
- Publicise our environmental position on our web site;
- Train employees in good environmental practice and encourage employee involvement in environmental action;
- To review the Environmental Policy, processes and procedures at least annually in the Management Review Meeting to ensure effectiveness of the overall management system;
- Aim to include environmental and ethical considerations in investment decisions where appropriate;
- Continually assess the environmental impact of all our operations;
- Review our performance against measurable quality objectives quarterly in regularly convened Directors Meetings and identify key areas for improvement based on performance and feedback.
